

Blairsville-Saltsburg School District

Medication Use Form

In compliance with the district's medication Policy No. 208 "Use of Medications" established January 1, 2002, the Blairsville-Saltsburg School District is attempting to discourage the dispensing of medications during school hours. However, should your physician advise it necessary for your child to receive medication during the school day, they must provide a signed, written order with specific directions on this form or an official prescription form.

Parent/Guardians must complete and sign this form requesting that the school nurse administer medication to your child.
